

SKIPPER'S BOOST UNIT

Buffered boost circuit with all the controls you need. Adjust the UNBOOST/BOOST control...

- counterclockwise from zero to clean up your dirty amp without losing the brightness of your sound
- clockwise from zero to fatten up your pickup signal. Make your single coil sing like a humbucker
- to zero-ish zone (up to taste) to use the Boost Unit as buffer only

power supply	9 VDC (center negative)
current draw	0,98 mA
max boost	18 dB
true bypass	yes
no nonsense	100%
